

Leroy Brown

Applied AI & Robotics

Production AI systems, NLP intelligence, governance controls, and deployed software.

GitHub Portfolio

github.com/icheftech/AI-Portfolio-Leroy-Brown

NLP Intelligence

NewsBot: topics, summaries, embeddings, sentiment, interactive exploration.

Governed AI

SSO control plane: policy gates, approvals, kill switches, audit chains.

Agentic Workflows

LangGraph systems for bids, cloud operations, and household automation.

Full-Stack Delivery

FastAPI, Next.js, PostgreSQL, deployment, documentation, and dashboards.

Learning Journey

From NLP foundations to agentic systems and responsible AI architecture.

Featured Projects

Three examples show the portfolio range: NLP, governance, and business automation.

NewsBot Intelligence Engine

Turns raw news into topics, summaries, sentiment, embeddings, and an interactive Gradio interface.

[FastAPI](#) | [LDA](#) | [DistilBART](#) | [SentenceTransformers](#)

SSO Control Plane

Governs AI workflows with NIST AI RMF alignment, policy gates, emergency stops, and cryptographic audit chains.

[Python](#) | [FastAPI](#) | [PostgreSQL](#) | [SQLAlchemy](#)

bidops

Scores and routes public contract opportunities using AI-native sourcing workflows and operational data.

[Next.js](#) | [FastAPI](#) | [LangGraph](#) | [Railway Postgres](#)

Project links are available from the main portfolio README.

Technical Arsenal

A practical stack for building useful, reviewable, and deployable AI systems.

AI/NLP

Topic modeling, summarization, embeddings, sentiment, NER

Agents

LangGraph workflows, routing, tool orchestration, human approval

Backend

FastAPI, Python, REST APIs, Postgres, Alembic, Supabase

Frontend

Next.js, TypeScript, React dashboards, deployed interfaces

Governance

NIST AI RMF, audit chains, control policies, PHI/PII practices

Reflection & Next Steps

The strongest lesson: useful AI needs product thinking, controls, data flow, and clear documentation.

Where I am growing

Production-grade AI services
Responsible automation with human oversight
Model-backed dashboards for real teams

What I am seeking

AI engineering roles
Applied NLP projects
Collaborations in governance and automation
